

All our floors with high environmental performance.

Average of 28% recycled material.

Zero climate impact from production.

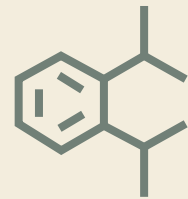

Low carbon footprint through climate-smart materials, renewable energy, and recycled material.

Average of 79% fossil-free products.

Documented climate footprint of third-party EPDs.

All floors free of hazardous heavy metals and phthalates.

Very low emission over full lifespan.

Wear resistant with long warranty and service life.

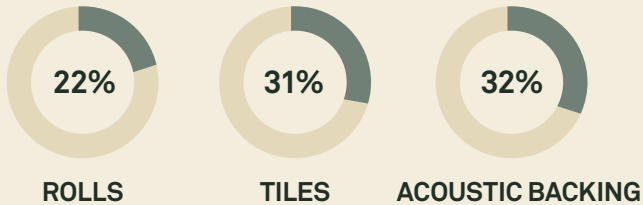

Manufactured in Sweden.

Circularity.

With our own recycling plant we have a strategic base to become fully circular. All our floors contain recycled material.

RECYCLED MATERIAL IN:

Climate.

All our floors are manufactured with 100% renewable energy, which gives zero climate impact from production.

We have a low carbon footprint through low weight per square meter, 28% recycled material and PVC with low fossil content.

Carbon footprint is available for all floors based on third-party EPDs from 2022.

CARBON FOOTPRINT KG/M2:

Health.

All our additives are hazardous free. This means that there are neither heavy metals nor dangerous phthalates in any of our floors.

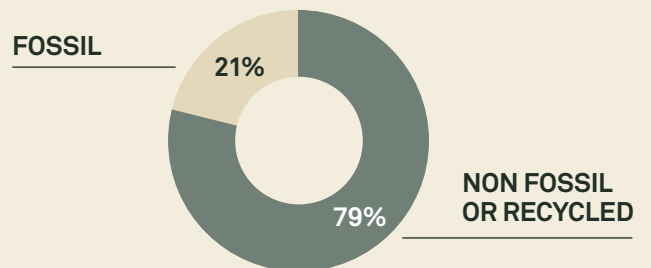

All floors are certified with very low emissions throughout their lifetime.

BOLON

Materials.

Our floors consist of chalk, PVC, polyester, and fiberglass. The chalk is 40% of the weight of the floor, is harmless and is widely available on the planet. Our eco-labelled PVC is completely free from the problems PVC has historically been associated with. With the combination of chalk, PVC and recycled material our floor has only 21% new fossil content.

FOSSIL AND RECYCLED:

Factory and supply chain.

All our production and development take place in Ulricehamn, Sweden. The factory operates with high quality for our products and social standards for all employees.

74% of all our suppliers are located within a 250 km radius of our factory. They are Swedish based companies with high social standards and ensure efficient transport with a low climate footprint.

Quality and durability.

We provide a 10-15 year warranty on all floors. Our product normally lasts significantly longer than that and requires no treatment except regular cleaning maintenance to stay nice throughout its life.
